

SPHEREboard Identity Hygiene Platform

BROCHURE

At SPHERE, we help our clients protect their most critical identities and data. By automating the process of continuous discovery and remediation, we deliver Identity Hygiene. Our SPHEREboard platform provides full visibility of the identities and data in your environment, assesses the effectiveness of the controls protecting them, and resolves control breaches.

What is Identity Hygiene? Simply put, it describes maintaining a *cleaner* identity environment where your core infrastructure and critical systems are better protected, your security risks are reduced, and potentially costly regulatory requirements are mitigated—all on an ongoing basis.

Ensuring Security Is a Daunting Challenge

In an ideal world, all your critical accounts and data would always be safe from cybercrime and other threats. However, we know this is not the case. Complex business environments are constantly introducing new vulnerabilities for threat actors to exploit, and no organization is immune from those risks.

> Evolving Threats

Identity is the new perimeter, and the threat landscape is constantly changing. Today's organizations are forced to take a reactive approach to an endless flow of cyber risks.

> Inconsistent and Ineffective Access Controls

Poor coverage and ineffective controls result in a false sense of security, leaving identities, and the systems they have access to, exposed to bad actors.

> Complexity

Large and complex environments, compounded by emerging threats, make it difficult to gain visibility of your most privileged accounts and vulnerable data.

> Heavy Lifting

Implementing an effective risk-reduction program requires a major organizational effort to achieve full deployment, broad adoption, and significant value.

> New Data and Identity Issues

Every organization is a massive data-creation machine, ensuring a constant flow of unstructured data to classify and protect.

REDUCE RISK BY
UNCOVERING AND
REMEDIATING CRITICAL
SECURITY GAPS

MEET SPHEREBOARD—OUR IDENTITY HYGIENE SOLUTION

SPHEREboard combines business intelligence, institutional knowledge, and industry best practices to deliver a comprehensive risk-reduction platform. Its detailed discovery capabilities and automated virtual workers identify and remediate account and data vulnerabilities quickly and efficiently. Continuously assessing your environment, SPHEREboard enables you to maintain a least-privilege state.

SPHEREboard Delivers:

- > **A platform built for practitioners.** Users of SPHEREboard quickly see what makes it different from other solutions. SPHEREboard’s capabilities and in-house methodology are sophisticated, while the platform remains extremely intuitive to use.
- > **Flexible modules.** Privileged accounts, unstructured data, legacy Active Directory group structures—dedicated and easily customizable SPHEREboard modules enable you to zero in on areas of focus.
- > **Seamless Integration with your security stack.** Leveraging an extensive catalog of connectors and virtual workers, SPHEREboard integrates with existing processes and technology stacks to enhance the accuracy and capabilities of your IAM, PAM, and data-security solutions.
- > **Technology alliance solutions that speed time-to-value.** Step up your current risk reduction potential with targeted solutions from the growing SPHEREboard solution portfolio like **SPHEREboard for CyberArk** (privileged identities) and **SPHEREboard for BigID** (data).

SPHERE’S SECRET WEAPON: PEOPLE POWER

We complement SPHEREboard’s technical capabilities with the expertise of our team. Our Tech-Enabled Services group helps expedite SPHEREboard’s implementation and integration into your environment. We have service offerings ranging from implementation and quick start remediation through full remediation programs and managed services.

Proven technology and committed people with extensive *boots-on-the-ground* risk reduction and remediation experience—that’s the powerful combination you get when you choose SPHEREboard.

THE BENEFITS OF SPHEREBOARD

Know who has access to what, why, and when.

Security leaders know that identity is the new perimeter. That's why organizations have invested heavily in solutions to help manage which users have access to what data and why. However, the IAM and PAM solutions used in the market today lack capabilities around discovery and remediation.

SPHEREboard Delivers Powerful Benefits To Your Organization

Significant Risk Reduction

SPHEREboard provides a two-pronged approach to reducing risk—identifying and protecting critical data while remediating identity issues like excessive privileged accounts or rampant open access.

Regulatory Compliance & Cyber Insurance

SPHEREboard helps your organization take a proactive approach to managing increasingly granular compliance and cyber insurance requirements by increasing visibility and reducing risk.

More Value

More than likely, your organization has already made significant investments in security. SPHEREboard helps your organization realize new value from the systems and solutions you have in place by integrating with widely adopted platforms to accelerate implementations and improve results.

Fast Results

SPHEREboard is designed to achieve fast results at all stages—discovery, reporting, and remediation. The platform's virtual workers expedite the remediation process, and our Asset Review Module enables users to collaborate with asset owners to determine the correct remediation steps.

Sustainable Risk Reduction

SPHEREboard's automation and sustainability processes ensure that controls are working on an ongoing basis, helping reduce future risk and regulatory issues, while managing new issues as they surface.

A PROVEN SOLUTION FOR RISK REDUCTION

Here's what our clients have to say about SPHEREboard

"SPHEREboard's extensive integration capabilities let it hit the ground running, accelerating analysis and remediation—and getting results—without waiting."

"Our Active Directory was a big mess, and it created every roadblock imaginable for our already delayed IAM program. SPHEREboard standardized all the objects and provided a way for use to manage AD groups on our own."

"The SPHERE team left an evergreen process behind for us. With SPHEREboard, we can continue to manage our risk and resolve all issues that come our way."

ABOUT SPHERE

SPHERE is the global leader in Identity Hygiene. We are dedicated to reshaping modern identity programs by embedding this foundational fabric, enabling organizations to quickly reduce risks. Our expertise lies in leveraging automation to deliver immediate time-to-value, providing an identity lens that protects an organization's accounts, data, and infrastructure.

Driven by our core values of passion, empathy, and transparency, our vision drives us to continually innovate, helping our clients to sleep better knowing their attack surface is drastically reduced, thwarting the plans of bad actors every single day.

We're ready to help you address your identity hygiene and security challenges. To find out more about SPHERE and our solutions, please visit www.sphereco.com
