# SPHEREboard for MESSAGINGcontrols

**Discovery, Certification and Automated Remediation of Messaging Infrastructure**

## Got messaging problems?

1. I don't know who has access to my user and shared mailboxes.

2. I have challenges managing distribution lists.

3. I need to get rid of my public folders but don't know how.

4. I don't want to move stale assets to Office 365.

**SPHEREboard for Messaging** streamlines reporting and remediation efforts both on-prem and in the cloud.

## SPHERE delivers an end-to-end solution to reduce risk and better govern your messaging and collaboration environments.

**Proper Governance of User, VIP and Shared Mailboxes:** View mailboxes and all permissions issues. Determine who has access, how it was granted and where. Inventory use case, quota and other metadata.

**Identify and Certify Distribution List Ownership and Membership:** Automate ownership identification through custom business rules to suit your environment. Regularly review membership with owners through automation

**Eliminate Public Folders:** Organize public folders into logical collections to pinpoint entire trees to easily retire. Catalogue use case and ownership for active collection. Automate owner outreach for migration planning and execution.

# SPHEREboard for MESSAGINGcontrols

## How it Works

**(1) COLLECT:** Scan Exchange on-prem and Office365, Azure AD, SharePoint and more. Correlate information from HR systems, CMDB's and all other platforms that supply contextual data. **SPHEREboard delivers agentless, comprehensive, flexible messaging controls.**

**(2) ORGANIZE:** Organize ownership across each asset (mailbox, public folder, DL, etc.) and establish use-cases. **SPHEREboard allows you to catalogue specific assets with VIP Ownership identification alongside associated metadata correlation.**

**(3) REPORT:** Identify stale/empty assets to reduce the overall size and overhead to manage the environment, examine for open, excessive and non-standard access, and present them in actionable ways. **SPHEREboard delivers enterprise metrics with drill down details to proactively hone-in on specific security issues.**

**(4) REVIEW**: Complete asset reviews with data owners and automate the standardization of access controls in mass. **SPHEREboard delivers holistic and customizable mailbox review with fully audited tracking capabilities.**

**(5) REMEDIATE:** Maintain a history of previous metrics for visibility into the improvement or worsening of security issues. **SPHEREboard delivers simple group membership changes and permission standardization.**

> *SPHEREboard provided a single pane of glass across all the messaging and collaboration platforms we manage. Not only did we gain visibility into the excessive access issues we had, but we were able to accelerate onboarding objects to the cloud.*
