Cloud Readiness Assessment

Gain better visibility into your unstructured data BEFORE you migrate to the cloud!

Ownership and Risk

SPHEREboard identifies ownership across your data and correlates the data owners to their associated business area. This will allow you to better plan and communicate to the appropriate end users! Next, data is represented to identify which area has the most risk to allow you to take a risk-based approach to moving data to the cloud.

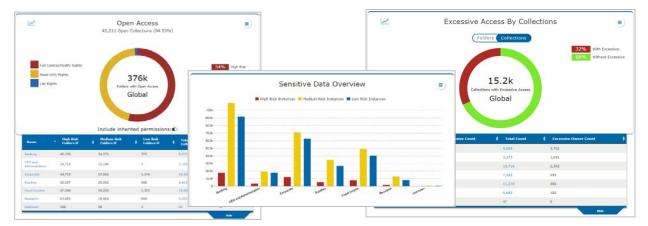

Contact us at sales@sphereco.com for a Cloud Readiness Assessment!

Security Issues

Understand and remediate your security issues BEFORE you migrate the data. Learn about your issues and drill down into specific areas of concern.

About SPHERE:

A woman-owned cybersecurity company that has performed over 100 Data Security Assessments and Remediations.

In the last decade, SPHERE has uncovered major vulnerabilities that have gone unnoticed and has prevented endless cases of sensitive data exposure and exfiltration.

Leveraging metadata of folders or activity data, SPHEREboard will provide the ability to understand the age of your folders and files across the different business areas.

Tip! Retire your stale data – only migrate active data to the cloud!
